PROFESSIONAL SUMMARY

Computer Science graduate and Programmer Analyst Trainee at Cognizant with a strong foundation in Java, SQL, automation testing, and software quality assurance. Completed QEA training focused on Selenium, TestNG, and Agile methodologies. Currently allocated to the World Bank Group (WBG) account while continuously enhancing skills in Playwright, TypeScript, Git, and test automation frameworks. Passionate about building reliable, scalable, and high-quality software solutions.

TECHNICAL SKILLS

- **Programming Languages:** Java, SQL, TypeScript
- **Automation Testing:** Playwright, Selenium WebDriver, TestNG, Page Object Model (POM), Data-Driven Testing
- **Frameworks & Concepts:** Automation Framework Design, BDD, SDLC, STLC, Agile Methodology
- **Data & Processing:** Pandas, NumPy, Data Preprocessing, NLP
- **Tools & Platforms:** Git, Jenkins, Excel
- **AI & Technologies:** Generative AI, Prompt Engineering, Groq LLM

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions

Programmer Analyst Trainee

Oct 2025-Present

- Successfully completed Quality Engineering & Assurance (QEA) training covering Java, Selenium WebDriver, TestNG, SQL, and automation testing concepts.
- Allocated to the World Bank Group (WBG) account.
- Participating in project onboarding, knowledge transfer sessions, and continuous technical learning
- Strengthening skills in Playwright, TypeScript, Git, Page Object Model (POM), and Agile methodologies.

PROJECTS

Trivago Hotel Search Automation

Selenium WebDriver, Java, TestNG, Page Object Model, Excel

- Automated multi-city hotel search scenarios using Selenium WebDriver, improving functional test coverage.
- Developed TestNG-based validation logic to verify hotel sorting accuracy based on dynamic rating criteria.
- Designed a maintainable automation framework using the Page Object Model (POM), improving code reusability and test execution stability.

EduQuest – Automatic Question Paper Generator

Python, Flask, SQL, NLP, Groq LLM, Pandas, NumPy

- Developed a Flask-based backend exposing REST APIs for automated question paper generation using NLP techniques.
- Built robust data preprocessing workflows transforming unstructured inputs into validated Built robust data preprocessing workflows to transform unstructured input into validated, structured question datasets.
- Improved question generation accuracy to **92%** by optimizing NLP processing, validation logic, and output consistency.

EDUCATION

ACE Engineering College

B.Tech - Computer Science Engineering | CGPA: 7.49

Sep 2021 – June 2025
